

In 2010 Alluvium was nominated along with 2 other companies as the best Victorian professional services firm. Unfortunately we did not get over the line and were beaten by a Actuarial firm. We were however the only engineering/environmental firm to be shortlisted for this State award and justifiably proud.

As a bit of background the BRW Awards are underpinned by the Annual Business and Professions Study undertaken by Beaton Consulting. This is a unique research initiative that promotes excellence in the business community. “With inputs from more than 30,000 business people, it is the largest study of its type in Australasia”. BRW 2009

Of the 300 firms that applied only 10% were short listed as a finalist for the 2010 BRW Client Choice Awards. Alluvium Consulting was shortlisted and was the only engineering firm with a revenue of less than 20M represented in the finalists.

Our utmost thanks is extended to our clients who made this achievement possible.
